4001 WET-LOOK EPOXY

WATERBORNE CLEAR EPOXY FLOOR SEALER

4001 Waterborne Clear Epoxy Floor Sealer is a two-component primer/sealer designed to improve the adhesion of coating systems to concrete and previously sealed surfaces or provide a breathable “wet look” seal over new, old, or decoratively stained concrete floor surfaces and overlays. Due to its unique ability to “breathe”, 4001 Epoxy is suitable for use over green concrete, and substrates with high moisture vapor emissions (MVE).

Use 4001 Epoxy as your general-purpose sealer over bare or feather-blasted concrete, or on acid/acrylic stained floors. 4001 Epoxy can also be used as a primer coat for subsequent coats that are applied over it during the cure.

FEATURES & ADVANTAGES

- Bonds to damp concrete floor surfaces
- Cures under cool or wet conditions
- 26% Solids, 22g/L VOC
- Ideal as a “wet look” sealer over concrete
- Makes a great primer when applying subsequent materials that have lower adhesion properties
