

VERSATILE

ECO CONCRETE PROFILER

USER-FRIENDLY CONCRETE ETCHER

Eco Concrete Profiler was specifically developed as a safe and environmentally friendly concrete profiler and cleaner. Unlike other heavy-duty concrete acid etchers, EcoConcrete Profiler is completely safe to use, non-hazardous, non-corrosive, and 100% biodegradable. It is the ideal muriatic acid etch alternative. Our advanced water-based formula incorporates a proprietary blend of surfactants and organic minerals for the most effective concrete etching solution available.

Eco Concrete Profiler does not contain phosphoric, hydrochloric, or muriatic acid, yet works better and safer.

Eco Concrete Profiler is the preferred eco-friendly and user-friendly acid etching alternative for interior or exterior concrete surface preparation applications. It will not burn skin, corrode metals, or harm vegetation.

FEATURES & ADVANTAGES

- Use Over New or Old Concrete
- Low Odor
- Non-Corrosive
- 100% Biodegradable
- Easy to Apply
- Water Clean Up
